There was a ery large attendance at the afternoon session to hear Dr. Valeria Parker of the Connecticut Society of Social Hygiene. Dr. Parker is a graduate physician, a member of the executive board of the Connecticut Prison association, visitor for the Connecticut Children's Aid society, lecturer for the Connecticut Society of Social Hygiene and lecturer in physiology at the Lanier school.

She said that there was a great need of instruction in this subject. There is little of it to be found in text books on flyelology and those familiar with the subject do not spread it to others.

There are three aspects to be considered. The first is knowledge of actual conditions, knowledge of actual conditions, knowledge of physical nature of human beings, and knowledge of moral values, There must be an ideal toward which we must work. Now as Christian men and women we have the ideal toward which we are to work in this great nation of ours and we are pledged to work toward family ideals. Social hygiene concerns itself with giving knowledge in regard to physical and moral relationships of men and women. We have here in this state a great many evils that are directly due to the misuse and misun-Dr. Parker's Address. state a great many evils that are di-rectly due to the misuse and misun-derstanding of the great life forces.

And yet there is in our state sufficient moral force to do away with every single one of them. single one of them.

The first bill to be introduced in the legislature for the betterment of women was introduced by the W. C. T. U. It was for the raising of the age of consent for women. The age of consent for women is simply that age which women are considered old enough to send them to their ruin. This state says that she is old enough at 16 years of age to make that decision, yet our state says that she is not sufficiently mature and mentally

responsible citizen.

Dr. Parker spoke of the need of a reformatory for women. The industrial school at Middletown, she said, does god work for the young girl, but after 21 there is no pince for the woman but fall. Women are not classified, the old offender and the girl who has been committed for her first offense are thrown together.

Connecticut Stands Second.

Connecticut stands second in the list in proportion to its population in the amount of money spent for paupers, insane and criminals. One reason is alcohol, but along with alcohol is destruction of family life, physical health, moral welfare. Every person who professes to be a Christian should be a responsible citizen.

PIANO RECITAL

Given in High School Hall by Miss Margaret Jamieson, Assisted by Mrs. Raymond Osburn.

Music loving people of Willimantic were given a rare treat Tuesday night when Miss Margaret Jamleson, pianist, assisted by Mrs. Raymond Osburn, soprano, and F. W. Lester, accompanist, gave a delightful recital in the high school auditorium. Although the weather was disagreeable, a fair sized audience were well repaid for attending.

ing.

Miss Jamieson is a niece of Archibald Mitchell of Norwich. She is a pinnist of great natural talent which has been carefully trained by the best teachers in this country. She is a graduate of the Oberlin Conservatory of Music and was a pupil of Rafael Josefy, the noted teacher, and is now studying with Sigsmond Stojowski of New York, of whom she has been a pupil for the past three years. She produces a very beautiful tone in all her playing, her touch being delightful. Her fingering is unusually clear, her legato is very smooth and, pleasing, chords were played with firmness, yet without the slightest harshness. These combined with her artistic use of the pedal made slightest harsiness. These combined with her artistic use of the pedal made for fine playing. Miss Jamieson is a conscientious student and has undoubtedly a great future before her. Her programme Tuesday evening was well chosen and each number was niterpreted in an artistic manner, and if she excelled in any one number more than another it was in the Besthoven than another it was in the Beethoven Sonata." From the opening allegro to the thunderous presto con fuco it was

a treat for musicians.

Mrs. Osburn was heard in sever numbers. Her first number, "Non ne veux fas chanter," was a number in which her voice was given an opportunity to display its flexibility. She sang with ease and with much expression. Her stage manner was charming and the was most enthusiastically applauded for her fine work.

Mr. Lester played Mrs. Osburn's accompaniments in his usual artistic manner, adding greatly to the evening's enjoyment. A number from Norwich attended the concert.
